A SCIENTIFIC JOURNAL ISSUED BY THE
ESCUELA AGRICOLA PANAMERICANA

LOUIS O. WILLIAMS, EDITOR

TEGUCIGALPA, HONDURAS

JULY 31, 1956

VOL. 5. - No. 1

AN ENUMERATION OF THE ORCHIDACEAE OF CENTRAL AMERICA, BRITISH HONDURAS AND PANAMA

LOUIS O. WILLIAMS

INTRODUCTION

THE REGION HERE CALLED CENTRAL AMERICA is the political entity which was formerly the Central American Federation. It consists of five republics today: Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica. The colony of British Honduras and the Republic of Panama are included for they form an integral part of the biological Central American area. Southeastern Mexico, as far as the Isthmus of Tehuantepec, belongs also to biological Central America. The orchids of the Mexican region have not been especially given in the present enumeration but I think that there will be found very few species of orchids in that region that are not also to be found in Central America and consequently in this list.

My interest in the orchids of this region extends back nearly twenty years, when I began keeping notes on my observations on the species of orchids occurring from Mexico to Panama. Parts of these notes were used when the "Orchidaceae of Mexico" was published; still more were used in the Orchidaceae of the "Flora of Panama". During the twenty year period many short papers were published on the orchids of the region.

The present enumeration is not more than that; a list of the orchids that occur in Central America, British Honduras and Panama with their synonyms, bibliography as applied to the region covered and the distribution of the species. The distribution is given by countries for our area and in broader terms outside of the region, for example "South America" or "West Indies" without specifying the exact location. If a species is known from all five Central American countries the range is recorded simply as "Central America".

It is more than possible that some species have been excluded that do grow in our region and that others not known now will be found as exploration continues. Ranges will be extended as new collections are made, which is to be expected.

Many of the species of orchids credited to Central America I have not seen personally nor have I had the opportunity to study them. Many of the types of Central American orchids were lost during the course of the second world war, especially may be mentioned those on which many of Schlechter's species were based, and it may never be possible to place them exactly.

The synonymy presented in this enumeration is often a synthesis that has come down in the literature through the years. Many times it is the accepted opinion of my colleagues of past years, Oakes Ames, Charles Schweinfurth, F. Tracy Hubbard, Donovan Correll, Gordon Dillon and Paul H. Allen. Often it is opinions arrived at in my own study of the orchids of the region. The synonymy will be changed as studies continue, other species will be added and some given here will go to their proper place.

DISTRIBUTION OF CENTRAL AMERICAN, BRITISH HONDURAN AND PANAMANIAN ORCHIDS

Central America, British Honduras and Panama. — We have listed for our region some 1335 species and 41 varieties of orchids. There are 361 of these species and varieties that are found also in Mexico; 105 are in the West

Indies and 195 are recorded as well for South America. A handful of species extend their range into the United States and two or three are found in Africa.

GUATEMALA.—We have recorded 511 species and varieties from Guatemala, distributed in 86 genera. The orchids of Guatemala are fairly well known for the country relatively has been well collected by competent collectors over a long period of time. There are many regions of Guatemala where orchids are abundant and some of these have not been collected in by many people. The Pacific slopes, extending from the Mexican border to about Escuintla, at elevations between 1,000 and 2,000 meters should prove to be the most fertile in additions to the Guatemalan orchid flora.

BRITISH HONDURAS.—We have recorded 97 species from the colony, distributed in 38 genera. There has been relatively little collecting in the country and although a great number of species are not to be expected there perhaps more should be found than are now known.

EL SALVADOR.—We have recorded 100 species and varieties for the republic, distributed in 41 genera. The natural arboreal vegetation of El Salvador has mostly been destroyed and it seems likely that the native orchid flora has largely been exterminated along with the trees.

HONDURAS.—We have recorded 332 species and varieties for the republic, in 73 genera. In 1918 Schlechter could find records of only 18 species known in the country. (I have collected nearly twice that number from one fallen tree.) There are still large areas in Honduras that are botanically unexplored, in fact relatively small portions of the whole have actually been visited by botanists. The mountains facing the Caribbean Sea should yield a large number of species. The most favorable elevations along these slopes would seem to be from about 600 to some 1500 meters. The forests of Honduras are rapidly being cut and burned away and it may be expected that within the foreseeable future the favorable habitats for orchids in the country will be greatly reduced. The highland cloud forests are relatively poor in orchids but contain some that are not

to be found elsewhere. Biological exploration of Honduras has been carried out mostly by foreigners, as is the case with most other countries of our region. Antonio Molina R. is the only native botanist of note and he is probably his country's most capable scientist.

NICARAGUA.—We have recorded 139 species and varieties of orchids for the country, distributed in 45 genera. In biological sciences and scientific exploration Nicaragua is perhaps the least favored of the Central American countries. Very few Nicaraguans have developed scientific interests and foreign scientists have usually avoided the country. There should be many more species found in the country, especially in the highlands which occupy the northwest part of the republic.

COSTA RICA.—We have recorded 907 taxa of orchids for Costa Rica; more than double the number catalogued by Schlechter in 1918. These orchids are distributed in 108 genera. In science Costa Rica has been the most favored country of our region for not only has it developed a number of competent scientists, in a favorable intellectual climate, but it has attracted an endless number of foreign scientists. Even though biological exploration is far more complete in Costa Rica than in any other country of our region the plant and animal life is so rich and varied that almost any collection will bring out unrecorded species. Most all regions of the country still repay biological exploration. Virgin forest areas are disappearing rapidly and with them will disappear many of the orchid species and other kinds of native plants and animals that require a forest habitat. The rich orchid flora of Costa Rica has obviously been supplied with species that might be said to be of Mexican or of Central America origin and of another group that has its origin in South America. The endemic element in the orchids of the country is very high and, of course, supplies some of the most interesting orchids of the country.

PANAMA.—We have recorded 474 taxa of orchids from Panama, four times as many as Schlechter knew in 1918. There are 88 genera listed for the country. The increase in knowledge of Panamanian orchids in recent years has been due largely to the explorations of Paul H. Allen. The

mountains of western and west central Panama still need much biological exploration and it is in this region where most additions to the orchid flora should be found. The forest areas of the region mentioned are being exploited for agricultural lands and for wood. At the present rate of exploitation the virgin forests should mostly be gone from Panama, west of the canal, before the century is out. With the forests will go most of the native plants that require a forest habitat.

ORCHID SPECIALISTS WHO HAVE WORKED WITH THE REGION

Almost all of the orchidologists of the last hundred years have worked with the orchids of our region. It will perhaps be of interest to mention some of them and a bit about them.

LINDLEY.—John Lindley might be called the father of modern orchidology. A large number of Central American species were described by him. The region was nearly pristine, so far as orchids were concerned, when he began his work with the plants of the region. His study of the orchids coincided with the beginning of intensive biological exploration of Central America. Lindley's interest in orchids was worldwide. He was a careful and critical observer.

REICHENBACH FILIUS.—H. G. Reichenbach was a younger contemporary of Lindley's and assisted in the opening of the study of orchids of many new regions of the world just then being explored. The interest in orchids as horticultural plants had come into its own by Reichenbach's time and he participated fully in the horticulturists' interest in orchids and, especially during his later years was the horticulturists' "expert" on the subject.

KRÄNZLIN.—Fritz Kränzlin took up where Reichenbach left off, in point of time. He wrote monographs of many American genera but did relatively little work of a floristic nature.

ROLFE.—R. Allen Rolfe did a small amount of work with Central American orchids, mostly those that got into cultivation at Kew.

SCHLECHTER.—(Friedrich Richard) Rudolf Schlechter was perhaps the most active student of the Orchidaceae of all time. His knowledge was worldwide and he worked with the orchids of all major areas of the world. He undoubtedly knew more about the systematics of orchids than any other botanist and has published literally hundreds of papers on the family. Schlechter is the only one among the students of orchids mentioned on these pages, except Allen, who has had experience with the plants in the tropics. He spent nearly twenty years, 1891-1910, in collecting in the tropics, — Africa, Borneo, Sumatra, Java, New Guinea, Australia and many other regions were visited and collected in by Schlechter. The first critical list of orchids of our region was Schlechter's "Kritische Aufzählung der bisher aus Zentral-Amerika bekanntgewordenen Orchideen" published in 1918. Schlechter died when only fifty three years old.

AMES.—Oakes Ames' interest began with the horticulture of the orchids but it soon expanded to systematics of the Orchidaceae, a field in which he became a specialist. His first important studies were on the orchids of the Philippine Islands and his work on the orchids of that region will remain classical for all time. Ames' interest increased to include orchids from much of the Pacific area and then to include most of the tropical regions of North America and western South America. Ames was a capable administrator and during the last half of his life much of his time was devoted to administrative duties.

HUBBARD.—F. Tracy Hubbard's systematic work in the Orchidaceae has been mostly with the North American species of *Epidendrum*. In addition to his interest in orchids and grasses he is an accomplished bibliographer and has done much work among the grasses and orchids as well as in economic plants.

SCHWEINFURTH. — Charles Schweinfurth, as have others, learned the systematics of orchids from Oakes Ames. His interest in the family covered the Pacific and American

areas with special interest in the orchid flora of Peru. Schweinfurth is one of the most meticulous systematists who has worked with the family.

CORRELL.—Donovan S. Correll's interests cover both ferns and orchids as well as economic plants. His main interest is in temperate North American orchids and ferns but he is mainly responsible for the work on the "Orchids of Guatemala", an exceedingly fine bit of descriptive work published by the Chicago Natural History Museum as a part of the "Flora of Guatemala".

ALLEN.—Paul H. Allen is a meticulous field man and observer who has worked extensively with the orchids of Panama, and to a less extent with those of other Central American countries. He probably knows more about Central American orchids in the field than anyone else.

BENTHAM.—George Bentham wrote the Orchidaceae in Bentham & Hooker, "Genera Plantarum", the best generic descriptions ever written for the Orchidaceae. Bentham's concept of genera in the family was conservative for the most part, and well thought out.

PFITZER.—Ernst Pfitzer wrote the account of the Orchidaceae for the "Natürliche Pflanzenfamilien" and the system proposed is the basis for the arrangement followed by most later orchidologists. It is still one of the most useful accounts of the genera.

HEMSLEY.—W. Botting Hemsley prepared the botany of the "Biologia Centrali-Americana" and the list of orchids which it contained. It was the first list to cover the region with which we are concerned. The list is not a critical one.

SPECIAL BIBLIOGRAPHY

There are several publications that have to do with the Orchidaceae of our region or contain enough information about them to make the publication especially useful.

BIOLOGIA CENTRALI-AMERICANA.—The botany of this work, prepared by Hemsley, contains the first list of orchids of our region.

FEDDE REPERTORIUM, BEIHEFTE.—The Beihefte contain several of Rudolf Schlechter's works on Central American orchids, among which may be mentioned: Beiträge zur Orchideenkunde von Zentralamerika, — I. Orchidaceae Powellianae Panamenses (Vol. 17, 1922); II. Additamenta ad Orchideologiam Costaricensem (Vol. 23, 1923); Blütenanalysen neuer Orchideen, II. Mittelamerikanische Orchideen (Vol. 59, part 2, 1931).

BEIHEFTE ZUM BOTANISCHEN CENTRALBLATT (Vol. 36, part 2, 1918) contains Schlechter's "Kritische Anzählung der bisher aus Zentral-Amerika bekanntgewordenen Orchideen", the first critical list of Mexican, Central American and Panamanian orchids.

FOLIA ORCHIDACEA and THE GENERA AND SPECIES OF ORCHIDACEOUS PLANTS, both private (and now scarce) publications of John Lindley have much that is basic to Central American orchid study.

ORCHIDACEAE (7 volumes), SCHEDULAE ORCHIDIANAE (10 parts) and THE GENUS EPIDENDRUM IN UNITED STATES AND MIDDLE AMERICA, all private publications of Oakes Ames, are essential to a Central American orchid library.

BOTANICAL MUSEUM LEAFLETS, Harvard University (18 volumes) have many articles on our region by several authors.

CEIBA. Volume 2 contains "The Orchidaceae of Mexico", which is provided with keys and generic descriptions, many applicable to our region.

FIELDIANA: BOTANY. Volume 26 contains the "Orchids of Guatemala", one of the best descriptive works on Central American orchids. There are many excellent plates.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE

9

FIELD MUSEUM OF NATURAL HISTORY, BOTANICAL SERIES. Volume 18 contains the "Flora of Costa Rica" in which there is an annotated list of Costa Rican orchids.

ANNALS OF THE MISSOURI BOTANICAL GARDEN. Volumes 33-36 contain the orchid part of the "Flora of Panama", a well illustrated descriptive account.

"THE ORCHIDS OF PANAMA", a reprint from the Orchid Journal with 41 good plates added.

XENIA ORCHIDACEA and BEITRÄGE ZUR ORCHIDEEN-KUNDE CENTRAL-AMERIKAS private publications of H. G. Reichenbach contain much useful information on Central American orchids.

ENUMERATION

SELENIPEDIUM Reichb. f., Xenia Orch. 1: 3. 1854.

A small genus of terrestrial orchids with only the following species in our region.

SELENIPEDIUM CHICA Reichb. f., Xenia Orch. 1: 3 fig. I, 2-5. 1854; Ames, Sched. Orch. 2: 1, t. 1. 1923; L. Wms. in Ann. Mo. Bot. Gard. 33: 144, f. 64. 1946.

Cypripedium chica Kränzl., Orch. Gen. & Sp. 1: 36. 1897.

One of the tallest of the orchids in our region.
Panama.

CYPRIPEDIUM L., Sp. Pl. ed. 1. 2: 951. 1753.

A boreal genus of which only the following species reaches into the tropics.

CYPRIPEDIUM IRAPEANUM Llave & Lex., Nov. Veg. Descr. fasc. 2: 10. 1824.

Cypripedium molle Lindl. in Benth., Pl. Hartw. 72 1840; Lindl., Gen. & Sp. Orch. Pl. 256. 1840.

A showy plant and the only Cypripedium known in Central America.

Mexico and Guatemala.

PHRAGMIPEDIUM (Pfitzer) Rolfe in Orch. Rev. 4: 331. 1896.

Paphiopedilum § *Phragmopedilum* Pfitzer in Engler, Bot. Jahrb. 25: 527. 1898.

There are two species of the genus known in our area and about a dozen in South America. Often cultivated.

PHRAGMIPEDIUM CAUDATUM (Lindl.) Rolfe in Orch. Rev. 4: 332. 1896.

Cypripedium caudatum Lindl., Gen. & Sp. Orch. Pl. 531. 1840.

Cypripedium Humboldti Warsz. ex Reichb. f. in Bot. Zeit. 10: 691. 1852.

Cypripedium Warszewiczianum Reichb. f., 1. c. 692.

Paphiopedilum caudatum Pfitzer in Engler, Bot. Jahrb. 19: 41. 1894.

Cypripedium caudatum var. *Warcewiczzii* Hort. in Kerch., Orch. 454. 1894.

Cypripedium caudatum var. *roseum* Hort. in Kerch., 1. c.

Phragmopedilum Warszewiczianum Schltr. in Fedde Rep. Beih. 17: 9. 1922.

Mexico, Guatemala, Honduras, Panama and South America.

PHRAGMIPEDIUM LONGIFOLIUM (Warsz. & Reichb. f.) Rolfe in Orch. Rev. 4: 33. 1896.

Cypripedium longifolium Warsz. & Reichb. f. in Bot. Zeit. 10: 690. 1852; Hook. f. in Bot. Mag. 98. t. 5970. 1872.

Selenipedium longifolium Reichb. f., Xenia Orch. 1: 3. 1854.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 11

Cypripedium Hincksonianum Reichb. f. in Gard. Chron. n. s. 9: 202. 1878.

Paphiopedilum longifolium Pfitzer in Engler & Prantl, Nat. Pflanzenf. II. 6: 84. 1888.

Paphiopedilum longifolium Kerch., Orch. 455. 1894.

Paphiopedilum Hincksonianum Pfitzer in Engler, Bot. Jahrb. 19: 41. 1894.

Costa Rica, Panama and Colombia.

HABENARIA Willd., Sp. Pl. 4: 44. 1805; Kränzl. Orch. Gen. & Sp. vols. 1 & 2: 1897-1903; Ames, Orch. vol. 4: 1910.

* *Bonatea* Willd., 1. c. 43.

Platanthera L. C. Rich. in Mém. Mus. Par. 4: 4. 1818.

A genus of worldwide distribution, polymorphic and often split into many genera.

HABENARIA ALATA Hook., Exot. Fl. 3: t. 169. 1826; Ames, Orch. 4: 273. 1910; Ames in Bot. Mus. Leafl. 3: 20, fig. 1934.

Habenaria platantheroides Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 372. 1918.

West Indies, Mexico, Central America and South America.

HABENARIA AMPAROANA Schltr. in Fedde Rep. Beih. 19: 6. 1923.
Costa Rica.

HABENARIA AVICULA Schltr. in Fedde Rep. 17: 138. 1921.

Habenaria patentiloba Ames in Proc. Biol. Soc. Wash. 34: 151. 1921.
Panama.

HABENARIA AVICULOIDES A. & S., Sched. Orch. 10: 1. 1930.
Costa Rica.

HABENARIA BICORNIS Lindl., Gen. & Sp. Orch. Pl. 309. 1835.

West Indies and Panama.

HABENARIA CLYPEATA Lindl., Gen. & Sp. Orch. Pl. 308. 1835.

Not common in Central America but abundant and much described from South American material.

Mexico, Guatemala, Honduras and South America.

HABENARIA BRENESII Schltr. in Fedde Rep. Beih. 19: 159. 1923.

Costa Rica.

HABENARIA CLYPEATA Lindl., Gen. & Sp. Orch. Pl. 311. 1835.

Habenaria lactiflora Rich. & Gal. in Ann. Sci. Nat. ser. III, 3: 28. 1845.

Habenaria spithamea Schltr. in Fedde Rep. 15: 195. 1918.

Allied to *H. entomantha* from which it is distinguished, in part, by the white flowers.

Mexico, Guatemala, Honduras, Costa Rica and Panama.

HABENARIA COSTARICENSESIS Schltr. in Fedde Rep. 17: 138. 1922.

Costa Rica.

HABENARIA CRASSICORNIS Lindl., Gen. & Sp. Orch. Pl. 311. 1835; Ames, Orch. 4: 233, t. 72. 1910.

The glandular pubescence of various parts of the flower, and often of the inflorescence, will help to distinguish this species from *H. entomantha*.

Mexico, Guatemala and Honduras.

HABENARIA DISTANS Griseb., Cat. Pl. Cuba 270. 1866; Ames, Orch. 4: 202. 1910.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 13

Habenaria Tuerckheimii Schltr. in Fedde Rep. 2: 129. 1906; Ames, Orch. 4: 206, t. 68. 1910.

Habenaria jamaicensis Fawc. & Rendle in Journ. Bot. 47: 126. 1909.

Habenaria distans var. *jamaicensis* Cogn. in Urb., Sym: Antill. 6: 300. 1909.

Florida, West Indies, Mexico, Guatemala and Costa Rica.

HABENARIA ENDRESIANA Schltr. in Fedde Rep. Beih. 19: 159. 1923.
Costa Rica.

HABENARIA ENTOMANTHA (Llave & Lex.) Lindl., Gen. & Sp. Orch. Pl. 311. 1835; Ames, Orch. 4: 242, t. 74. 1910.

Habenaria flexuosa Lindl., 1. c.

Habenaria tetranema Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 273. 1918.

Habenaria hondurensis Ames in Bot. Mus. Leafl. Harv. Univ. 5: 36, t. 1934.

Mexico, British Honduras, Guatemala and Honduras. Reported from Venezuela.

HABENARIA EUSTACHYA Reichb. f. in Ber. Deut. Sch. Bot. Gesell. 3: 274. 1885.

West Indies, Mexico, Guatemala and Honduras.

HABENARIA GYMNADENIOIDES Schltr. in Fedde Rep. Beih. 19: 271. 1923.

Costa Rica.

HABENARIA HEPTADACTyla Reichb. f. in Linnaea 22: 812. 1849.

Panama and South America.

HABENARIA IRAZUENSIS Schltr. in Fedde Rep. Beih. 19: 271. 1923.

Costa Rica.

HABENARIA JIMENEZII Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 372. 1918.
Costa Rica.

HABENARIA LAATIANA Schltr. in Fedde Rep. 21: 330. 1925.

Guatemala.

HABENARIA LANKESTERI Ames, Sched. Orch. 4: 2. 1923.

Costa Rica.

HABENARIA LIMOSA (Lindl.) Hemsl. in Godm. & Salv., Biol. Centr.-Am. Bot. 3: 305. 1894; Ames, Orch. 4: 109. 1910.

Platanthera limosa Lindl. in Ann. Nat. Hist. 4: 381. 1840.

Platanthera guatemalensis Schltr. in Fedde Rep. 15: 193. 1918.

Southwestern United States, Mexico, and Guatemala.

HABENARIA MESODACTYLA Griseb., Fl. Br. W. Indies 644. 1864; Ames, Orch. 4: 211, t. 70. 1910.
West Indies, British Honduras. (*Lundell 6712*).

HABENARIA MONORRHIZA (Sw.) Reichb. f. in Ber. Deut. Bot. Gesell. 3: 274. 1885.

Orchis monorrhiza Sw., Nov. Gen. & Sp. Prodr. 118. 1788.

West Indies, Central America and South America.

HABENARIA NOVEMFIDA Lindl. in Benth., Pl. Hartw. 94. 1842; Ames in Bot. Mus. Leafl. Harv. Univ. 3: 27, t. 1934.

Habenaria diffusa R. & G. in Ann. Sci. Nat. ser. 3, 3: 28. 1845.

Habenaria diploura Schltr. in Fedde Rep. 15: 194. 1918.

Habenaria quinquefila Schltr., 1. c. 195.

Allied to *H. entomantha* but is easily recognized by the taller stems and the large leaves.

Mexico, Guatemala, El Salvador, Honduras and Costa Rica.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 15

HABENARIA OERSTEDII Reichb. f. in Bonpl. 3: 213. 1855.

I have never seen this plant.
Nicaragua.

HABENARIA PAUCIFLORA (Lindl.) Reichb. f. in Bonpl. 2: 10. 1854.

Bonatea pauciflora Lindl., Gen. & Sp. Orch. Pl. 329. 1835.

Habenaria setifera Lindl. in Ann. Nat. Hist. 4: 381. 1840.

Habenaria spathacea R. & G. in Ann. Sci. Nat. ser. 3. 3: 29. 1845.
Mexico to Argentina.

HABENARIA PETALODES Lindl., Gen. & Sp. Orch. Pl. 316. 1835.

Habenaria petalodes var. *micrantha* Reichb. f., Beitr. Orch. Cent. Am. 5. 1866.

Habenaria Warszewiczii Schltr. in Anex. Mem. Inst. Butantan 12: 25. 1921.
Panama and South America.

HABENARIA QUINQUESETA (Michx.) Sw., Adnot. Bot. 46. 1829.

Orchis quinqueseta Michx., Fl. Bor. Am. 2: 155. 1803.

Habenaria macroceratitis Willd., Sp. Pl. 4: 44. 1805.

Habenaria macroceratitis var. *brevicalcarata* Ames, Orch. 4: 224. 1910.

Southeastern United States, Mexico, British Honduras, Guatemala, Honduras, El Salvador, Nicaragua and South America.

HABENARIA REPENS Nutt., Gen. N. Am. Pl. 2: 190. 1818; Ames in Bot. Mus. Leafl. Harv. Univ. 3: 35, f. 1934.

Southeastern United States, West Indies, Central America and South America.

Habenaria strictissima Reichb. f. in *Linnaea* 18: 407. 1844; Ames, *Orch.* 4: 272. 1910.

Habenaria latipetala Schltr. in *Fedde Rep.* 15: 194. 1918.

Mexico, Guatemala, Honduras and Nicaragua.

Habenaria strictissima var. *odontopetala* (Reichb. f.) L. Wms. in *Bot. Mus. Leafl. Harv. Univ.* 7: 184. 1939.

Habenaria odontopetala Reichb. f. in *Linnaea* 18: 407. 1844.

Habenaria Selerorum Schltr. in *Bull. Herb. Boiss.* 7: 539. 1899.

Florida, West Indies, Mexico, Guatemala, Honduras and Costa Rica.

Habenaria verecunda Schltr. in *Fedde Rep. Beih.* 19: 6. 1923.

Costa Rica.

Habenaria Wercklei Schltr. in *Fedde Rep. Beih.* 19: 7. 1923.

Costa Rica.

Pogonia Juss., Gen. 65. 1789.

Triphora Nutt., Gen. N. Am. Pl. 2: 192. 1818; Ames, *Orch.* 7: 9, 39. 1922.

Psilochilus Barb. Rodr., *Orch. Nov.* 2: 272. 1882.

Cleistes L. C. Rich. in *Mém. Mus. Paris* 4: 31. 1818.

It is a matter of choice whether the genera given above, as synonyms of *Pogonia*, be maintained separately or not. I prefer the more conservative course.

There is a need to study critically the species of this group. There are almost certainly more names represented here than there are valid species.

Prof. Ames in his *Orchidaceae*, vol. 7, has proposed separation of several of the "Pogonia genera" as represented in our region. When I studied this group for the "Orchidaceae of Mexico", on more ample material than Prof. Ames had, I found no line at which generic lines could

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 17

be drawn. I still know of no method of separating these plants into distinct genera.

Pogonia cubensis Reichb. f. in *Nederl. Kruidk. Arch.* 4: 322. 1850, as *rubensis*.

Triphora cubensis Ames, *Sched. Orch.* 7: 35. 1924.
Florida, West Indies, Mexico, Guatemala and Honduras.

Pogonia debilis Schltr. in *Fedde Rep.* 15: 196. 1918.

Triphora debilis Schltr., 1. c. 17: 139. 1921.
Guatemala.

Pogonia macrophylla Lindl. in *Ann. & Mag. Nat. Hist. ser.* 3, 1: 335. 1854.

Psilochilus macrophyllus Ames, *Orch.* 7: 45, t. 1922.
West Indies, Guatemala and South America.

Pogonia mexicana S. Wats. in *Proc. Am. Acad.* 26: 154. 1891.

Triphora mexicana Schltr. in *Fedde Rep.* 17: 139. 1921.
Mexico, Guatemala, Honduras and Panama.

Pogonia nitida Schltr. in *Beih. Bot. Centralbl.* 36, Abt. 2: 373. 1918.

Triphora nitida Schltr. in *Fedde Rep.* 17: 139. 1921.
Costa Rica.

Pogonia rosea (Lindl.) Hemsl. in *Godm. & Salv. Biol. Cent.-Am. Bot.* 3: 304. 1884.

Cleistes rosea Lindl., Gen. & Sp. *Orch. Pl.* 410. 1840.
Costa Rica, Panama and South America.

Pogonia trianthophora (Sw.) Britt., Sterns & Poggenb., *Prelim. Cat. Anth. & Pterido.* N. Y. 52. 1888.

Arethusa trianthophoros Sw., *Kongl. Svens. Vet. Akad. nya Handl.* 21: 230. 1800.

Triphora trianthophora Rydb. in Brit., Man. Fl. N. States & Canada ed. 1, 298. 1901.
United States, possibly Guatemala.

POGONIA WAGNERI (Schltr.) L. Wms. in Ann. Mo. Bot. Gard. 33: 19. 1946.

Triphora Wagneri Schltr. in Fedde Rep. 17: 139. 1921.
Panama.

VANILLA Sw. in Nov. Act. Upsal. 6: 66. 1799.

A genus distributed in the tropics of the world, containing some fifty ill-defined species. The vanilla of commerce is made from the fruits of species of this genus.

VANILLA INODORA Schiede in Linnaea 4: 574. 1829.

Almost certainly in Central America but I have seen no specimens that could be so identified without question.
West Indies, Mexico and northern South America.

VANILLA PFAVIANA Reichb. f. in Gard. Chron. n. s. 20: 230. 1833; Ames in Bot. Mus. Leafl. Harv. Univ. 4: 26, f. 1936.

Vanilla Preusii Kränzl. in Notizbl. Bot. Gart. Mus. Berlin 7: 320. 1919.
Mexico, British Honduras, Guatemala and Costa Rica.

VANILLA PLANIFOLIA Andrews, Bot. Repos. 8: t. 538. 1808; Dillon in Am. Orch. Soc. Bull. 10: 339, t. 11. 1942.

Myrobroma fragrans Salisb., Parad. Lond. t. 82. 1807.

Vanilla fragrans Ames, Sched. Orch. 7: 36. 1924.

Vanilla insignis Ames in Bot. Mus. Leafl. Harv. Univ. 2: 101, t. 1934.

This is the common vanilla of commerce and is grown as a plantation crop in several parts of the world. Wild fruits of this are occasionally collected in Central America and used to prepare vanilla.

Vanilla rubra (Lam.) Urban may eventually prove to be the proper name of this species.

Florida, West Indies, Mexico, British Honduras, Central America, Panama and South America. Widely cultivated.

VANILLA POMPONA Schiede in Linnaea 4: 573. 1829.

Vanilla Pittieri Schltr. in Fedde Rep. 3: 103. 1906.

This species has been in cultivation, and probably still is.

West Indies, Mexico, Central America and South America.

PISTEPHIUM Kunth, Synops. Pl. Aequin. 1: 340. 1822.

PISTEPHIUM SP.

There is a specimen in the Ames Herbarium at Harvard University that seems to belong to this genus but it is not satisfactory for description. The genus is not known otherwise in North America.

British Honduras.

ELLEANTHUS Presl, Rel. Haenk. 1: 97. 1827.

Epilyna Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 375. 1918.

A genus with but few species in our region but with a large number in the Andes of South America. The taxonomy is difficult.

ELLEANTHUS ALBERTII Schltr. in Fedde Rep. Beih. 19: 162. 1923.

Costa Rica.

ELLEANTHUS AURANTIACUS (Lindl.) Reichb. f. in Walp. Ann. 6: 482. 1863.

Evelyna aurantiaca Lindl. in Benth., Pl. Hartw. 149. 1844.

Mus. Leafl. Harv. Univ. 5: 38. 1937.

Epilyna Jimenezii Schltr. in Beih. Bot. Centralbl. 36,
Abt. 2: 375. 1918.
Costa Rica.

ELLEANTHUS LAXUS Schltr. in Fedde. Rep. 12: 213.
1913.
Costa Rica (?) and Panama.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 21

ELLEANTHUS LINIFOLIUS Presl, Rel. Haenk. 1: 97.
1827.

Isochilus linifolius Lindl., Gen. & Sp. Orch. Pl. 113.
1831.

West Indies, Mexico, British Honduras, Central Amer-
ica to South America.

ELLEANTHUS MUSCICOLA Schltr. in Fedde Rep. Beih.
19: 10. 1923.

The small persistant leaves are curious in the genus.
Costa Rica and Panama.

ELLEANTHUS POIFORMIS Schltr. in Fedde Rep. Beih.
19: 164. 1923.
Guatemala and Costa Rica.

ELLEANTHUS TRICALLOSUS A. & S., Sched. Orch. 8:
51, t. 1924.
Costa Rica.

ELLEANTHUS TRILOBATUS A. & S. in Sched. Orch. 8:
53. 1924.

Probably a synonym of *E. Brenesii*.
Costa Rica and Panama.

ELLEANTHUS WERCKLEI Schltr. in Fedde Rep. Beih.
19: 11. 1923.
Nicaragua and Costa Rica.

SOBRALIA Ruiz & Pavón, Fl. Peruv. & Chil. Prodr.
120, t. 26. 1794.

Fregea Reichb. f. in Bot. Zeit. 10: 712. 1852.

Lindsayella A. & S. in Bot. Mus. Leafl. Harv. Univ.
5: 33. 1935.

The center of distribution of Sobralia is probably in
Central America and Panama. The flowers are often large
and showy but fugaceous which makes the group difficult
to study. It is certainly one of the most difficult genera in
Central America and whether or not it can be satisfactorily
worked out is questionable.

Funkiella Schltr., 1. c. 430
Mesadenella Pabst & Garay in Arq. Jard. Bot. (Rio) 12: 209. 1952.

The synonyms listed above have all been accredited to Central America, as genera, at one time or another. I consider them all to belong to *Spiranthes* in the broad sense.

The most comprehensive account of the group is Schlechter's "Versuch einer systematischen Neuordnung der Spiranthinae" in Beih. Bot. Centralbl. 37, Abt. 2: 317-seq. 1920. There are 24 genera given as components of the group of which I consider 23 to belong to *Spiranthes* and one seems to me not to belong in the "Spiranthinae". I recognise three genera of the "Spiranthinae" for our region, *Spiranthes*, *Eurystyles* and *Lankesterella*.

SPIRANTHES ACAULIS (J. E. Sm.) Cogn. in Fl. Bras. 3⁴: 221. 1895.

West Indies, Mexico, British Honduras and South America.

SPIRANTHES AMABILIS Ames, Sched. Orch. 2: 8. 1923. West Indies and Guatemala.

SPIRANTHES AURANTIACA (Llave & Lex.) Hemsl. in Godm. & Salvin, Biol. Cent. Am. Bot. 3: 300. 1885.

Neottia aurantiaca Llave & Lex., Nov. Veg. Descr. 2: 2. 1825.

Stenorrhynchus aurantiacus Lindl., Gen. & Sp. Orch. Pl. 479. 1840.

Gyrostachys aurantiaca O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

One of the most colorful of the *Spiranthes* and when abundant on open hillsides it is very attractive.

Mexico, Guatemala and Honduras.

SPIRANTHES BICAUDATA Ames, Orch. 7: 126. 1922.

Closely allied to *S. costaricensis* and reduced to it by Ames and Correll in Fieldiana Bot. 26: 106. 1952. I believe that the species are distinct.

West Indies, Mexico, Guatemala, El Salvador, Costa Rica.

SPIRANTHES bracteosa (A. & S.) L. Wms., comb. nov.

Stenorrhynchus bracteosus A. & S., Sched. Orch. 8: 6. 1925.

Costa Rica.

SPIRANTHES CERINA Lindl. in Bot. Reg. 28: Misc. p. 20. 1842.

Sarcoglossis cerina W. Baxter in Loud., Hort. Brit. Suppl. 3: 634. 1839.

Sarcoglossis lobata W. Baxter, 1. c.

Spiranthes lobata Lindl. in Bot. Reg. 30: Misc. p. 11. 1844.

Curiously enough the names published by Lindley are not based on those of Baxter but were independently published as novelties.

Mexico and Guatemala.

SPIRANTHES CINNABARINA (Llave & Lex.) Hemsl. in Godm. & Salv., Biol. Cent. Am. Bot. 3: 300. 1885.

Neottia cinnabrina Llave & Lex., Nov. Veg. Descr. 2: 3. 1825.

Stenorhynchus montanus Lindl. in Benth., Pl. Hartw. 95. 1842.

Spiranthes montana Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845.

Spiranthes montana Hemsl., 1. c. 301.

Gyrostachys montana O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

An uncommon species nearly allied to *S. aurantiaca*. Mexico and Guatemala.

SPIRANTHES COSTARICENSIS Reichb. f. in Bonpl. 3: 214. 1855.

Beloglottis costaricensis Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 365. 1920.

Gyrostachys costaricensis O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Spiranthes subpandurata A. & S., Sched. Orch. 8: 4, f. 1. 1925.

West Indies, Mexico, Guatemala, Honduras, Costa Rica and Panama.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 35

SPIRANTHES CRANICOIDES (Griseb.) Cogn. in Urban, Symb. Ant. 6: 338. 1909; Ames & Correll in Fieldiana Bot. 26: 106, f. 29. 1952.

Pelezia cranichoides Griseb., Cat. Pl. Cub. 269. 1866. Florida, West Indies and British Honduras.

SPIRANTHES ECALLOSA A. & S., Sched. Orch. 10: 7. 1930.

Costa Rica.

SPIRANTHES ELATA (Sw.) L. C. Rich. in Mém. Mus. Par. 4: 59. 1818.

Satyrium elatum Sw., Nov. Gen. & Sp. Prodr. 119. 1788.

Neottia elata Sw. in K. Vet. Akad. Handl. 21: 226. 1800; Sims, Bot. Mag. 45: t. 2026. 1818.

Spiranthes comosa Reichb. f. in Linnaea 18: 408. 1844.

Sauroglossum Richardii Ames, Orch. 1: 44. 1905.

Sauroglossum nigricans Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 379. 1918.

Cyclopogon elatus Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 387. 1920.

Cyclopogon miradorensis Schltr. in Fedde Rep. 21: 332. 1925.

Florida, West Indies, Central America and south to Argentina.

SPIRANTHES ENSIFOLIA Reichb. f. in Bonpl. 6: 211. 1856.

"Central America". The species not known to me.

SPIRANTHES ERIOPHORA Rob. & Greenm. in Am. Journ. Sci. ser. 3, 50: 165. 1895.

Schiedeella eriophora Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 380. 1920.
Mexico and Guatemala.

SPIRANTHES FUNCKIANA Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845.

Plexia Funckiana Schltr. in Fedde Rep. 15: 197. 1918, as *P. Funkiana*.

Plexia guatemalensis Schltr., 1. c.

Plexia congesta A. & S., Sched. Orch. 10: 5. 1930.

Mexico, Guatemala, Honduras, Panama and possibly South America.

SPIRANTHES FUNCKIANA var. *OLIVACEA* (Rolfe) A. & C. in Bot. Mus Leafl. Harv. Univ. 10: 66. 1942.

Plexia olivacea Rolfe in Kew Bull. 200. 1891.

Plexia hondurensis Ames, Sched. Orch. 2: 4. 1923.

Plexia subaequalis Ames, 1. c. 5.

Plexia callosa Ames, 1. c. 7: 15. 1924.

Mexico, Guatemala, Honduras, Nicaragua, Costa Rica and South America.

SPIRANTHES GRAMINEA Lindl. in Benth., Pl. Hartw. 25 1840.

Gyrostachys graminea O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Closely allied to *Spiranthes vernalis* and difficult to distinguish from it.

Mexico, Guatemala, British Honduras and Nicaragua.

SPIRANTHES GUTTEROSA Reichb. f., Beitr. Orch. Cent. Am. 67. 1866; Xenia Orch. 2: 187, t. 179. 1873.

Sarcoglossis gutterosa Ames in J. D. Sm., Enum. Pl. Guat. 7: 49. 1905.

Mexico and El Salvador.

SPIRANTHES GUYANENSIS (Lindl.) Cogn. in Mart., Fl. Bras. 3⁴: 209, t. 42. 1895; L. Wms. in Ann. Mo. Bot. Gard. 33: 47. 1946.

Spiranthes aguacatensis Reichb. f. in Bonpl. 5: 214. 1855; Ames, Sched. Orch. 2: 7. 1923.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 37

Goodyera guyanensis Lindl., Gen. & Sp. Orch. Pl. 494. 1840.

Brachystele guyanensis Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 373. 1920.

Brachystele aguacatensis Schltr., 1. c.

Gyrostachys aguacatensis O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Spiranthes Brenesii Schltr. in Fedde Rep. 10: 418. 1912.

Brachystele Brenesii Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 372. 1920.

Mexico, Guatemala, Honduras, Costa Rica, Panama and South America.

SPIRANTHES HEMICHREA Lindl., Gen. & Sp. Orch. Pl. 437. 1840.

Spiranthes Nelsonii Greenm. in Proc. Am. Acad. 35: 307. 1900.

Spiranthes pulchra Schltr. in Fedde Rep. 15: 198. 1918.

Dierogyne hemichrea Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 427. 1920.

Dierogyne pulchra Schltr., 1. c. 428.

Sarcoglossis hemichrea Ames, Sched. Orch. 2: 9. 1923.

Gyrostachys hemichrea O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Mexico, Guatemala and El Salvador.

SPIRANTHES HONDURENSIS Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 378. 1918.

This species is probably a synonym of *Spiranthes trilineata* var. *thelymitra*. I have seen no authentic material. Honduras.

SPIRANTHES HYEMALIS Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845.

Stenorrhynchus pauciflorus Reichb. f. in Bonpl. 4: 211. 1856, not *Spiranthes pauciflora* Rich. & Gal.

Funkiella hyemalis Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 431. 1920.
Mexico, Guatemala and Honduras.

SPIRANTHES LANKESTERI Standl. & L. Wms. in Ceiba 3: 110. 1952.
Costa Rica.

SPIRANTHES LLAVEANA Lindl. in Benth., Pl. Hartw. 72. 1842.

Neottia micrantha Llave & Lex., Nov. Veg. Descr. 2: 5. 1825, non *Spiranthes micrantha* Rodr.

Spiranthes transversalis Rich. & Gal. in Ann. Sci. Nat. sér. 3; 3: 32. 1845.

Schiedeella Llaveana Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 380. 1920.

Schiedeella transversalis Schltr., 1. c. 381.
Mexico, Guatemala and Honduras.

SPIRANTHES LLAVEANA var. VIOLACEA (Rich. & Gal.) A. & C. in Bot. Mus. Leafl. Harv. Univ. 10: 67. 1942.

Spiranthes violacea Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845.

Cyclopogon violaceus Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 396. 1920.
Mexico and Guatemala.

SPIRANTHES MINUTIFLORA Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845; A. & S. in Bot. Mus. Leafl. Harv. Univ. 3: 130. 1935.

Mesadenus minutiflorus Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 368. 1920.
Mexico, Guatemala and Costa Rica.

SPIRANTHES NAVARRENSIS (Ames) L. Wms. in Ann. Mo. Bot. Gard. 29: 337. 1942.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 39

Stenorrhynchus navarrensis Ames, Sched. Orch. 9: 13, f. 3. 1925.

This species is closely allied to *Spiranthes speciosa*. Costa Rica and Panama.

SPIRANTHES NUTANTIFLORA Schltr. in Fedde Rep. 2: 131. 1906.

Ames & Correll, in the Orchids of Guatemala, reduce this species to *Spiranthes minutiflora*. They may be correct. Guatemala.

SPIRANTHES OBTECTA C. Schweinf. in Bot. Mus. Leafl. Harv. Univ. 4: 106. 1937.
Guatemala.

SPIRANTHES ORCHIOIDES (Sw.) L. C. Rich. in La Sa-gra, Fl. Cub. Fan. 11: 252. 1853.

Satyrium orchiooides Sw., Nov. Gen. & Sp. Prodr. 118. 1788.

Neottia orchiooides Sw., Fl. Ind. Occ. 1411. 1799.

Stenorrhynchus orchiooides L. C. Rich. in Mém. Mus. Par. 4: 59. 1818.

Stenorrhynchus guatemalensis Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 376. 1918.

Spiranthes orchiooides is found on hillsides soon after the first rains of the rainy season (or spring). It is variable in color, from white to usually brick red. Leaves follow the flowering stalks.

United States, West Indies, Mexico, Central America, Panama and south to Argentina.

SPIRANTHES PARASITICA Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845; A. & C. in Fieldiana Bot. 26: 120, t. 32. 1952.

Schiedeella parasitica Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 381. 1920, as *S. paratica*.

Texas, Arizona, Mexico and Guatemala.

SPIRANTHES PARASITICA var. *VALERIOI* (A. & S.) L.
Wms. in Ceiba 1: 186. 1950.

Spiranthes Valerioi A. & S., Sched. Orch. 10: 8. 1930.

The cinnabar red, spongy thickening on the lip of the species is lacking in the variety.
Costa Rica.

SPIRANTHES PAUCIFLORA Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 32. 1845.

Gyrostachys pauciflora O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Sarcoglossis pauciflora Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 418. 1920.

One of the largest flowered species of *Spiranthes*. Although often abundant in the field it is difficult to find due to coloration similar to the grasses among which it grows.

Mexico, Guatemala, El Salvador and Honduras.

SPIRANTHES POLYANTHA Reichb. f. in Linnaea 18: 408. 1844; A. & C. in Fieldiana Bot. 26: 122, t. 1952.

Gyrostachys polyantha O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Mesadenus polyanthus Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 369. 1920.

Florida, West Indies, Mexico and Guatemala.

SPIRANTHES PRASOPHYLLA Reichb. f., Beitr. Orch. Cent. Am. 65. 1866; L. Wms. in Ann. Mo. Bot. Gard. 33: 48, t. 78. 1946

Gyrostachys Prasophyllum O. Kuntze, Rev. Gen. Pl. 2: 664. 1891

Spiranthes epiphytica Schltr. in Fedde Rep. 2: 130. 1906.

Cyclopogon prasophyllum Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 393. 1920.

An epiphytic species allied to *Spiranthes elata*.
Guatemala, Honduras, Costa Rica and Panama.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 41

SPIRANTHES PRASOPHYLLUM var. *CLEISTOGAMA* A. & C. in Bot. Mus. Leafl. Harv. Univ. 10: 65. 1942.
Guatemala and Costa Rica.

SPIRANTHES PYRAMIDALIS Lindl., Gen. & Sp. Orch. Pl. 472. 1840.

Gyrostachys pyramidalis O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Spiranthes cobanensis Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 377. 1918.

Schiedeella cobanensis Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 380. 1920.

Schiedeella pyramidalis Schltr., l. c. 381.
Mexico, Guatemala and El Salvador.

SPIRANTHES ROSULATA (W. Baxt.) Lindl. in Bot. Reg. 29: Misc. p. 60. 1843.

Sarcoglossis rosulata W. Baxter in Loud., Hort. Brit. Suppl. 3: 634. 1839.

Sarcoglossis orbiculata Ames, Sched. Orch. 2: 10. 1923.
Very closely allied to *Spiranthes acaulis*.
Mexico, Guatemala, El Salvador and Honduras.

SPIRANTHES RUBRICALLOSA Rob. & Greenm. in Am. Journ. Sci. 50: 165. 1895.

Spiranthes porphyricola Schltr. in Fedde Rep. 3: 18. 906.
Mexico and Guatemala.

SPIRANTHES SARCOGLOSSA Rich. & Gal. in Ann. Sci. Nat. sér. 3, 3: 31. 1845.

Galiottiella sarcoglossa Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 361. 1920.

A curious *Spiranthes* much like *Habenaria* in aspect.
Mexico and Guatemala.

SPIRANTHES SCEPTRODES Reichb. f. in Bonpl. 5: 214. 1855.

Reported from Guatemala and Nicaragua. I know nothing of it.

SPIRANTHES SCHAFFNERI Reichb. f. in *Linnaea* 28: 382. 1856.

Gyrostachys Schaffneri O. Kuntze, *Rev. Gen. Pl.* 2: 664. 1891.

Sarcoglossis Schaffneri Ames in *J. D. Sm., Enum. Pl. Guat.* 7: 50. 1905.

Pelezia saccata Rolfe in *Kew Bull.* 7. 1893.

Sarcoglossis Zamororae Ames, *Sched. Orch.* 2: 13. 1923.

Mexico and Guatemala.

SPIRANTHES SEMINUDA Schltr. in *Fedde Rep.* 3: 18. 1906.

Mexico and Guatemala.

SPIRANTHES SMITHII Reichb. f. in *Gard. Chron.* 842. 1868.

Gyrostachys Smithii O. Kuntze, *Rev. Gen. Pl.* 2: 664. 1891.

Spiranthes Bradei Schltr. in *Beih. Bot. Centralbl.* 36, Abt. 2: 376. 1918.

Sarcoglossis Smithii Schltr. in *Beih. Bot. Centralbl.* 37, Abt. 2: 422. 1920.

Sarcoglossis Bradei Schltr., l. c. 415.
Costa Rica.

SPIRANTHES SPECIOSA (J. F. Gmel.) A. Rich. in *La Sagra, Fl. Cub. Fan.* 11: 252. 1853.

Satyrium plantagineum L., *Veg. Syst. ed.* 10: 1244. 1758-59, non *Spiranthes plantaginea* Lindl., Spreng., nor Torr.

Serapias speciosa J. F. Gmel., *Syst.* 59. 1791.

Neottia speciosa Jacq., *Ic. Pl. Rar.* 3: t. 600. 1793.

Spiranthes colorata N. E. Br. in *Gard. Chron. n. s.* 19: 210. 1883.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 43

Spiranthes colorans N. E. Br. ex Hemsl. in *Godm. & Salv., Biol. Cent. Am. Bot.* 3: 300. 1884.

Normally an epiphytic species found in wet or cloud forests. It is quite colorful in its native habitat.

West Indies, Mexico, Guatemala, Honduras, Costa Rica, Panama and South America.

SPIRANTHES STANDLEYI (Ames) L. Wms. in *Ceiba* 1: 128. 1950.

Stenorhynchus Standleyi Ames, *Sched. Orch.* 9: 14, f. 3. 1925.

One of the most handsome species of the genus. It has done well in cultivation in Costa Rica.

Costa Rica.

SPIRANTHES STOLONIFERA Ames & Correll in *Bot. Mus. Leafl. Harv. Univ.* 10: 63, t. 3. 1942.
Guatemala.

SPIRANTHES TONDUZII Schltr. in *Fedde Rep.* 9: 26. 1910.

Stenorhynchus Tonduzii Schltr. in *Beih. Bot. Centralbl.* 37, Abt. 2: 448. 1920.

Mesadenella Tonduzii Pabst & Garay in *Arq. Jardim Botanico (Rio)* 12: 209. 1952.
Costa Rica.

SPIRANTHES TORTILIS (Sw.) L. C. Rich. in *Mém. Mus. Par.* 4: 59. 1818.

Neottia tortilis Sw., *Kongl. Svens. Vet. Akad. nya Handl.* 21: 226. 1800.

Southeast United States, West Indies, Guatemala, British Honduras, Honduras and Nicaragua.

SPIRANTHES TRILINEATA Lindl. in *Benth., Pl. Hartw.* 94. 1842.

Deiregyne trilineata Schltr. in *Beih. Bot. Centralbl.* 37, Abt. 2: 428. 1920.
Guatemala.

SPIRANTHES TRILINEATA var. THELYMITRA (Reichb. f.) L. Wms. ex Correll in Lloydia 10: 209. 1947.

Spiranthes thelymitra Reichb. f., Beitr. Orch. Cent. Am. 66. 1866.

Gyrostachys thelymitra O. Kuntze, Rev. Gen. Pl. 2: 664. 1891.

Deiregyne thelymitra Schltr. in Beih. Bot. Centralbl. 37, Abt. 2: 428. 1920.

Sarcoglottis thelymitra Ames in Bot. Mus. Leafl. Harv. Univ. 2: 76, 84. 1934.

Mexico, Guatemala, El Salvador, Honduras, Costa Rica.

SPIRANTHES VERNALIS Engelm. & Gray in Boston Journ. Nat. Hist. 5: 236. 1845.

United States, Mexico and Guatemala.

SPIRANTHES WERCKLEI Schltr. in Fedde Rep. 10: 482. 1912.

Costa Rica.

SPIRANTHES WOODSONII L. Wms. in Ann. Mo. Bot. Gard. 29: 337. 1942.
Panama.

EURYSTYLES Wahra in Oestr. Bot. Zeitschr. 13: 223. 1863.

A small genus with a half dozen species in Brazil and Central America. Mostly or all epiphytes.

EURYSTYLES AURICULATA Schltr. in Fedde Rep. Beih. 19: 86. 1923.
Costa Rica.

EURYSTYLES STANLEYI Ames, Sched. Orch. 9: 9, f. 2. 1925.
Costa Rica.

LANKESTERELLA Ames, Sched. Orch. 4: 3. 1923.
A small genus allied closely to *Spiranthes*. There is one species in Central America and possibly several in South America.

LANKESTERELLA COSTARICENSESIS Ames, Sched. Orch. 4: 3. 1923.
Costa Rica.

GOODYERA R. Br. in Ait., Hort. Kew. ed. 2, 5: 197. 1813.

Epipactis of authors.

GOODYERA EROSA (A. & S.) AHS. in Bot. Mus. Leafl. Harv. Univ. 3: 37. 1934.

Epipactis erosa A. & S., Sched. Orch. 10: 9. 1930.
Costa Rica.

GOODYERA MAJOR A. & C. in Bot. Mus. Leafl. Harv. Univ. 10: 68, t. 4. 1942.
Guatemala.

GOODYERA MICRANTHA Schltr. in Fedde Rep. Beih. 19: 274. 1923.
Costa Rica.

GOODYERA MODESTA Schltr. in Fedde Rep. Beih. 19: 89. 1923.
Costa Rica.

GOODYERA OVATILABIA Schltr. in Fedde Rep. Beih. 19: 274. 1923.
Costa Rica.

GOODYERA STRIATA Reichb. f. in Linnaea 18: 409. 1855.

Epipactis striata A. A. Eaton in Proc. Biol. Soc. Wash. 21: 66. 1908.
Mexico, Guatemala and Honduras.

GOODYERA TURIALBAE Schltr. in Fedde Rep. Beih. 19: 275. 1923.
Costa Rica.

ERYTHRODES Blume, Bidjr. Fl. Nederl. Ind. 410, t. 72. 1825; Ames, Orch. 7: 63. 1922.

Physurus L. C. Rich. in Mém. Mus. Par. 4: 55. 1818, *nomen nudum*.

Erythrodes occurs in the tropics of both hemispheres.

ERYTHRODES CALOPHYLLA (Reichb. f.) Ames, Orch. 7: 68. 1922.

Physurus calophyllus Reichb. f., Beitr. Orch. Cent. Am. 64. 1873.
Costa Rica.

ERYTHRODES CLAVIGERA (Reichb. f.) Ames, Orch. 7: 70. 1922.

Physurus claviger Reichb. f. in Bonpl. 4: 11. 1856.
This species is obscure.
Costa Rica.

ERYTHRODES KILLIPII Ames in Proc. Biol. Soc. Wash. 34: 150. 1921.

Costa Rica and Panama.

ERYTHRODES LEHMANNII (Schltr.) Ames, Orch. 7: 71. 1922.

Physurus Lehmannii Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 379. 1918.
Costa Rica.

ERYTHRODES LOXOGLOTTIS (Reichb. f.) Ames, Orch. 7: 71. 1922.

Physurus loxoglossis Reichb. f., Beitr. Orch. Cent. Am. 64. 1866.
Guatemala.

ERYTHRODES NIGRESCENS (Schltr.) Ames, Orch. 7: 74. 1922.

Physurus nigrescens Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 380. 1918.
Costa Rica.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 47

ERYTHRODES OVATILABIA A. & C. in Bot. Mus. Leafl. Harv. Univ. 10: 70, t. 5. 1942.
Mexico and Guatemala.

ERYTHRODES PURPUREA Ames, Orch. 5: 28. 1915.

Physurus purpureus Ames, Orch. 2: 259. 1908.

Physurus lunifera Schltr. in Fedde Rep. 15: 199. 1918.

Physurus argyrosticta Schltr., 1. c. 16: 440. 1920.

Erythrodes argyrosticta Ames, Orch. 7: 66. 1922.

Erythrodes lunifera Ames, 1. c. 71.

Mexico, Guatemala, Honduras and Costa Rica.

ERYTHRODES QUERCITICOLA (Lindl.) Ames, Orch. 5: 29. 1915.

Physurus querciticola Lindl., Gen. & Sp. Orch. Pl. 505. 1840.

Physurus vaginatus Hook., Ic. Pl. t. 449. 1842.

Erythrodes vaginata Ames, Orch. 7: 77. 1922.

Physurus humidicola Schltr. in Fedde Rep. 15: 198. 1918.

Physurus trilobatus Schltr., 1. c. 99.

Florida to Texas, West Indies, Mexico, Central America and South America.

ERYTHRODES STICTOPHYLLA (Schltr.) Ames, Orch. 7: 76. 1922.

Physurus stictophyllum Schltr. in Fedde Rep. 10: 249. 1911.
Guatemala.

ERYTHRODES TRIDAX (Reichb. f.) Ames, Orch. 7: 76. 1922.

Physurus tridax Reichb. f., Beitr. Orch. Cent. Am. 64. 1866.
Costa Rica.

ERYTHRODES TUERCKHEIMII (Schltr.) Ames, Orch. 7: 77. 1922.

Physurus Tuerkheimii Schltr. in Fedde Rep. 2: 132. 1906.

Physurus polygonatus Ames, Orch. 2: 259. 1908.

Erythrodes polygonata Ames, Orch. 5: 28. 1915.
Guatemala, Honduras and Costa Rica.

ERYTHRODES VENUSTULA Ames, Orch. 5: 28. 1915.

Physurus venustulus Ames, Orch. 2: 261. 1908.

Erythrodes querciticola var. *venustula* Correll in Lloydia 10: 210. 1947.
Guatemala, Honduras and Costa Rica.

ERYTHRODES VESICIFERA (Reichb. f.) Ames, Orch. 7: 78. 1922.

Physurus vesiciferus Reichb. f., Beitr. Orch. Cent. Am. 63. 1866.
Mexico, Guatemala, Costa Rica and Panama.

TROPIDIA Lindl. in Wall., Cat. No. 7386. 1832; in Bot. Reg. 19: sub t. 1618. 1833.

A small genus found in the tropics or subtropics of both hemispheres.

TROPIDIA POLYSTACHYA (Sw.) Ames, Orch. 2: 262. 1908.

Serapias polystachya Sw., Fl. Ind. Occ. 1415. 1799.

Cloidia vernalis Lindl., Gen. & Sp. Orch. Pl. 484. 1840.

Cloidia polystachya Reichb. f. in Walp. Ann. 6: 644. 1863.

Corymborchis polystachya O. Kuntze, Rev. Gen. Pl. 2: 658. 1891.

Florida, West Indies, Mexico, Guatemala, Costa Rica and Galapagos Islands.

1956 WILLIAMS: ENUMERATION OF ORCHIDACEAE 49

CORYMBBORCHIS Thouars, Orch. Iles Afr. t. 37, 38. 1822.

Corymbis Thouars, 1. c.

A pantropic genus with only the two following species in the western hemisphere.

CORYMBBORCHIS FLAVA (Sw.) O. Kuntze, Rev. Gen. Pl. 2: 658. 1891.

Serapias flava Sw., Nov. Gen. & Sp. Pl. Prodr. 119. 1788.

Corymbis flava Hemsl. in Godm. & Salv., Biol. Cent. Am. Bot. 3: 297. 1884.

West Indies, British Honduras, Costa Rica, Panama and South America.

CORYMBBORCHIS FORCIPIGERA (Reichb. f.) L. Wms. in Bot. Mus. Leafl. Harv. Univ. 12: 237. 1946.

Macrostylis forcipigera Reichb. f. in Bonpl. 2: 96. 1854.

Corymborchis cubensis Acuña in Bol. Téc. 60, Est. Exp. Agron. Santiago de las Vegas 51. 1939; Correll in Bot. Mus. Leafl. Harv. Univ. 8: 125. 1940.

West Indies, Guatemala, British Honduras, El Salvador, Costa Rica and South America.

STELIS Sw. in Schrader's Journ. f. Bot. 2: 239. 1799; in Svenska Vet.-Akad. Handl. 21: 248. 1800, *nom. conserv.*

Stelis is a rather large genus and technically a difficult one. Oakes Ames took special interest in the genus and understood them better than anyone else. His interest was principally in the Mexican and Central American species.

STELIS AEMULA Schltr. in Beih. Bot. Centralbl. 36, Abt. 2: 385. 1918.

Stelis sarcodantha Schltr., 1. c. 392.
Costa Rica and Panama.

STELIS ALFAROI A. & S., Sched. Orch. 8: 14. 1925.
Costa Rica.

Masdevallia guatemalensis Schltr. in Fedde Rep. 15: 201. 1918.

Masdevallia linearifolia Ames, Sched. Orch. 5: 7. 1923.

Guatemala, Honduras, Costa Rica, Panama and South America.

MASDEVALLIA TENUISSIMA C. Schweinf. in Bot. Mus. Leafl. Harv. Univ. 4: 111. 1937.
Panama.

MASDEVALLIA TONDUZII Woolward in Bull. Herb. Boiss., ser. 2, 6: 82. 1906.
Costa Rica.

MASDEVALLIA TRIARISTELLA Reichb. f. in Gard. Chron. n. s. 6: 226. 1876.
Costa Rica and South America.

MASDEVALLIA TRICHAETE Reichb. f. in Gard. Chron. n. s. 20: 360. 1883.
Costa Rica, possibly.

MASDEVALLIA TRIDACTYLITES Reichb. f. in Gard. Chron. n. s. 19: 784. 1883.
Costa Rica.

MASDEVALLIA TUBIFLORA Ames, Orch. 2: 265. 1908.
Guatemala, British Honduras, Honduras and Costa Rica.

MASDEVALLIA ZAHLBRUCKNERI Kränzl. in Fedde Rep. 17: 413. 1921.
Costa Rica.

SCAPHYSEPALUM Pfitzer in Engler & Prantl, Nat. Pflanzenf. II, 6: 139. 1889.
This genus might very well be referred to Masdevallia.

SCAPHYSEPALUM ANCHORIFERUM (Reichb. f.) Rolfe in Journ. Bot. 28: 136. 1890.

Masdevallia anchorifera Reichb. f. in Gard. Chron. n. s. 21: 577. 1884.
Costa Rica.

SCAPHYSEPALUM ELASMATOPUS Schltr. in Fedde Rep. 12: 204. 1913.

Scaphysepalum longirepens Ames in Proc. Biol. Soc. Wash. 34: 153. 1921.

This species might well be placed in the genus Pleurothallis.

Panama.

SCAPHYSEPALUM ENDRESIANUM Kränzl. in Fedde Rep. 17: 435. 1921.

Costa Rica.

SCAPHYSEPALUM NAVICULARE Kränzl. in Fedde Rep. 17: 436. 1921.

Costa Rica.

SCAPHYSEPALUM PITTIERI Schltr. in Fedde Rep. 3: 78. 1906.

Costa Rica.

SCAPHYSEPALUM STANDLEYI Ames, Sched. Orch. 9: 24, t. 4. 1925.

Costa Rica.
